INDEX TO AUTHORS

A

Albaum, Harry G., and **Cohen, Philip P.** Transamination and protein synthesis in germinating oat seedlings, 19

Almquist, H. J., and **Grau, C. R.** Growth-promoting activity of betaine in the chick, 575

Andrade, Sylvia O. See *Rocha e Silva and Andrade*, 9

Axelrod, Bernard. See *Balls, Axelrod, and Kies*, 491

B

Baker, E. E. See *Hassid, Baker, and McCready*, 303

Balls, A. K., Axelrod, Bernard, and **Kies, Marian W.** Soy bean lipoxidase, 491

Barlow, O. W. See *Huber and Barlow*, 125

Barnes, Richard H., Lundberg, W. O., Hanson, H. T., and **Burr, George O.** The effect of certain dietary ingredients on the keeping quality of body fat, 313

Beadle, B. W., Greenwood, D. A., and **Kraybill, H. R.** Stability of thiamine to heat. I. Effect of pH and buffer salts in aqueous solutions, 339

—. See *Greenwood, Beadle, and Kraybill*, 349

Bendich, Aaron. See *Chargaff and Bendich*, 93

Berg, Benjamin N. See *Bloch, Berg, and Rittenberg*, 511

Berg, Robert L. See *Westerfeld, Stotz, and Berg*, 237

Bloch, Konrad, Berg, Benjamin N., and **Rittenberg, D.** The biological conversion of cholesterol to cholic acid, 511

— and **Rittenberg, D.** The preparation of deuterio cholesterol, 505

Bohonos, Nestor, and **Peterson, W. H.** The chemistry of mold tissue. XVI. Isolation of fungus cerebrin from the mycelium of *Aspergillus sydowi*, 295

Bovarnick, Marianna R. Chemical and biological assays of the nicotinamide-like substance formed in heated mixtures of asparagine and glutamic acid, 301

Boyer, Paul D., Lardy, Henry A., and **Phillips, Paul H.** Further studies on the rôle of potassium and other ions in the phosphorylation of the adenylic system, 529

Burr, George O. See *Barnes, Lundberg, Hanson, and Burr*, 313

C

Carter, Herbert E., and **Dickman, S. R.** Anomalous amino nitrogen values, 571

Cawley, John D. See *Jensen, Shantz, Embree, Cawley, and Harris*, 473

Chaikoff, I. L. See *Sheline, Chaikoff, Jones, and Montgomery*, 139

Chandler, Joseph P. See *Simmonds, Cohn, Chandler, and du Vigneaud*, 519

Chargaff, Erwin, and **Bendich, Aaron.** On the coagulation of fibrinogen, 93

Cohen, Philip P. See *Albaum and Cohen*, 19

Cohn, Mildred. See *Schenck, Simmonds, Cohn, Stevens, and du Vigneaud*, 355

—. See *Simmonds, Cohn, Chandler, and du Vigneaud*, 519

Craig, Lyman C., and **Jacobs, Walter A.** The veratrine alkaloids. XX. Further correlations in the veratrine group. The relationship between the veratrine bases and solanidine, 451

—. See *Jacobs and Craig*, 271

D

Deuel, Harry J., Jr. See *Johnston and Deuel*, 117

Dickman, S. R. See *Carter and Dickman*, 571

Dimick, Keene P. A quantitative method for the determination of tyrothricin, 387

Doisy, E. A., Jr., and **Westerfeld, W. W.** The relationship of acetoin to metabolic acetylations, 229
Drabkin, David L. See *Rosenthal and Drabkin*, 437

E

Elam, Daniel W. See *Lundgren, Elam, and O'Connell*, 183
Embree, Norris D. See *Jensen, Shantz, Embree, Cawley, and Harris*, 473
Evans, Herbert M. See *Li, Evans, and Simpson*, 413

F

Frame, Elizabeth G., Russell, Jane A., and **Wilhelmi, Alfred E.** The colorimetric estimation of amino nitrogen in blood, 255
Free, Alfred H., and **Leonards, Jack R.** Serum phosphorus changes during the absorption and metabolism of glucose, galactose, and xylose, 203

G

Gaebler, Oliver Henry. The relationship of extinction to wave-length in turbid sera and other suspensions, 251
Grafa, Barney G., Jr. See *Treadwell, Tidwell, and Grafa*, 209
Granick, S. Ferritin. IV. Occurrence and immunological properties of ferritin, 157
Grau, C. R. See *Almquist and Grau*, 575
Greenwood, D. A., Beadle, B. W., and **Kraybill, H. R.** Stability of thiamine to heat. II. Effect of meat-curing ingredients in aqueous solutions and in meat, 349
—. See *Beadle, Greenwood, and Kraybill*, 339
Guest, George Martin. See *Rapoport, Leva, and Guest*, 57, 65

H

Haagen-Smit, A. J. See *Lepkovsky, Roboz, and Haagen-Smit*, 195
Handler, Philip. The effect of simultaneous mineral and choline deficiencies on liver fat, 291
Hanson, H. T. See *Barnes, Lundberg, Hanson, and Burr*, 313
Harris, Philip L. See *Jensen, Shantz, Embree, Cawley, and Harris*, 473
Hassid, W. Z., Baker, E. E., and **McCready, R. M.** An immunologically active polysaccharide produced by *Coccidioides immitis* Rixford and Gilchrist, 303
Hess, W. C., and **Sullivan, M. X.** Canine cystinuria. Urinary excretion of cystine following the administration of homocystine, homocysteine, and some derivatives of cystine and cysteine, 543
Hines, Leonard R., and **Mattill, H. A.** The chemical determination of tocopherols in liver and muscle; tocopherol in urine and feces, 549
Hogan, Albert G. See *O'Dell and Hogan*, 323
Huber, W., and **Barlow, O. W.** Chemical and biological stability of crystalline vitamins D_2 and D_3 and their derivatives, 125

J

Jacobs, Walter A., and **Craig, Lyman C.** The veratrine alkaloids. XIX. On protoveratrine and its alkamine, protoverine, 271
—. See *Craig and Jacobs*, 451
Jaffé, Werner G. Hurain, a new plant protease from *Hura crepitans*, 1
Jensen, James L., Shantz, Edgar M., Embree, Norris D., Cawley, John D., and **Harris, Philip L.** The biological activity of vitamin A_2, 473
Johnston, Cornelia, and **Deuel, Harry J., Jr.** Studies on ketosis. XXI. The comparative metabolism of the hexitols, 117
Jones, H. B. See *Sheline, Chaikoff, Jones, and Montgomery*, 139
Junowicz-Kocholaty, R. See *Meyerhof and Junowicz-Kocholaty*, 71

K

Keys, Ancel. See *Mickelsen and Keys*, 479

Kies, Marian W. See *Balls, Axelrod, and Kies*, 491
Kirch, Ernst R. See *Martinek, Kirch, and Webster*, 245
Krause, R. F. Changes induced by anemia in the bone marrow lipids of cats, 395
Kraybill, H. R. See *Beadle, Greenwood, and Kraybill*, 339
—. See *Greenwood, Beadle, and Kraybill*, 349

L

Lardy, Henry A., and **Phillips, Paul H.** The effect of thyroxine and dinitrophenol on sperm metabolism, 177
—. See *Boyer, Lardy, and Phillips*, 529
Lehninger, Albert L. A note on the identity of a carbonyl compound isolated from beef liver, 43
Leonards, Jack R. See *Free and Leonards*, 203
Lepkovsky, Samuel, and **Parsons, Della.** The effect of pyridoxine deficiency in the rat upon the catalase activity of its tissues, 281
—, **Roboz, Elisabeth**, and **Haagen-Smit, A. J.** Xanthurenic acid and its rôle in the tryptophane metabolism of pyridoxine-deficient rats, 195
Leva, Ernst, and **Rapoport, S.** The determination of acid-soluble phosphoglycerol in liver, 47
—. See *Rapoport, Leva, and Guest*, 57, 65
Li, Choh Hao, Evans, Herbert M., and **Simpson, Miriam E.** Adrenocorticotropic hormone, 413
Long, C. N. H. See *Sayers, White, and Long*, 425
Lundberg, W. O. See *Barnes, Lundberg, Hanson, and Burr*, 313
Lundgren, Harold P., Elam, Daniel W., and **O'Connell, Richard A.** Electrophoretic study of the action of alkylbenzenesulfonate detergents on egg albumin, 183

M

MacFadyen, Douglas A., and **Van Slyke, Donald D.** Note on the use of the *o*-phenanthroline ferrous complex as an indicator in the ceric sulfate titration of blood sugar, 527
Martinek, Robert G., Kirch, Ernst R., and **Webster, George L.** Determination of nicotinic acid, 245
Mattill, H. A. See *Hines and Mattill*, 549
McCready, R. M. See *Hassid, Baker, and McCready*, 303
Melnick, Daniel. See *Siegel, Melnick, and Oser*, 361
Meyerhof, O., and **Junowicz-Kocholaty, R.** The equilibria of isomerase and aldolase, and the problem of the phosphorylation of glyceraldehyde phosphate, 71
Mickelsen, Olaf, and **Keys, Ancel.** The composition of sweat, with special reference to the vitamins, 479
Miller, A. T., Jr. Studies on tissue water. II. A macro modification of the distillation method for the determination of tissue water, 153
Montgomery, M. Laurence. See *Sheline, Chaikoff, Jones, and Montgomery*, 139

O

Ochoa, Severo. α-Ketoglutaric dehydrogenase of heart extracts, 577
O'Connell, Richard A. See *Lundgren, Elam, and O'Connell*, 183
O'Dell, Boyd L., and **Hogan, Albert G.** Additional observations on the chick antianemia vitamin, 323
Oser, Bernard L. See *Siegel, Melnick, and Oser*, 361

P

Parsons, Della. See *Lepkovsky and Parsons*, 281
Pepkowitz, Leonard P. The stability of carotene in acetone and petroleum ether extracts of green vegetables. I. The photochemical destruction of carotene in the presence of chlorophyll. II. The stabilizing effect of sodium cyanide, 465
Peterson, W. H. See *Bohonos and Peterson*, 295

Phillips, Paul H. See *Boyer, Lardy, and Phillips*, 529
—. See *Lardy and Phillips*, 177
Potter, V. R. See *Schneider and Potter*, 217

R

Rapoport, S., Leva, Ernst, and **Guest, George Martin.** The distribution of acid-soluble phosphorus in the livers of fasted rats fed glucose, casein, olive oil, or a mixed diet, 65
—, —, and —. The distribution of acid-soluble phosphorus in the livers of rats, fed and fasting, 57
—. See *Leva and Rapoport*, 47
Reineke, E. P., and **Turner, C. W.** The recovery of crystalline thyroxine from iodinated casein, 555
— and —. The recovery of *l*-thyroxine from iodinated casein by direct hydrolysis with acid, 563
Rittenberg, D. See *Bloch, Berg, and Rittenberg*, 511
—. See *Bloch and Rittenberg*, 505
Roboz, Elisabeth. See *Lepkovsky, Roboz, and Haagen-Smit*, 195
Rocha e Silva, M., and **Andrade, Sylvia O.** Histamine and proteolytic enzymes. Liberation of histamine by papain, 9
Rosenthal, Otto, and **Drabkin, David L.** Spectrophotometric studies. XI. The direct micro spectrophotometric determination of cytochrome *c*, 437
Russell, Jane A. See *Frame, Russell, and Wilhelmi*, 255

S

Sayers, George, White, Abraham, and **Long, C. N. H.** Preparation and properties of pituitary adrenotropic hormone, 425
Schenck, Jay R. On the origin of β-alanine in the animal body and a microbiological method of β-alanine assay, 111
—, **Simmonds, Sofia, Cohn, Mildred, Stevens, Carl M.,** and **du Vigneaud, Vincent.** The relation of transmethylation to anserine, 355
Schmidt, Gerhard, and **Thannhauser, S. J.** Intestinal phosphatase, 369
Schneider, W. C., and **Potter, V. R.** The assay of animal tissues for respiratory enzymes. II. Succinic dehydrogenase and cytochrome oxidase, 217
Shantz, Edgar M. See *Jensen, Shantz, Embree, Cawley, and Harris*, 473
Sheline, G. E., Chaikoff, I. L., Jones, H. B., and **Montgomery, M. Laurence.** Studies on the metabolism of zinc with the aid of its radioactive isotope. II. The distribution of administered radioactive zinc in the tissues of mice and dogs, 139
Siegel, Louis, Melnick, Daniel, and **Oser, Bernard L.** Bound pyridoxine (vitamin B_6) in biological materials, 361
Simmonds, Sofia, Cohn, Mildred, Chandler, Joseph P., and **du Vigneaud, Vincent.** The utilization of the methyl groups of choline in the biological synthesis of methionine, 519
—. See *Schenck, Simmonds, Cohn, Stevens, and du Vigneaud*, 355
Simpson, Miriam E. See *Li, Evans, and Simpson*, 413

INDEX TO SUBJECTS

A

Acetoin: Metabolic acetylations, relation, *Doisy and Westerfeld*, 229
Acetylation: Metabolic, acetoin relation, *Doisy and Westerfeld*, 229
Adenylic system: Phosphorylation, potassium and other ions, rôle, *Boyer, Lardy, and Phillips*, 529
Adrenal(s): Cortex hormone. *See also* Adrenocorticotropic hormone
Adrenocorticotropic hormone: *Li, Evans, and Simpson*, 413
Adrenotropic hormone: Pituitary, preparation and properties, *Sayers, White, and Long*, 425
Alanine: β-, determination, microbiological, *Schenck*, 111
—, origin, body, *Schenck*, 111
Albumin: Egg. *See* Egg albumin
Alcohol(s): Pyruvate and, oxidation-reduction, coupled, *in vivo*, *Westerfeld, Stotz, and Berg*, 237
Aldolase: Equilibrium, *Meyerhof and Junowicz-Kocholaty*, 71
Alkaloid(s): Veratrine, *Jacobs and Craig*, 271
Craig and Jacobs, 451
Alkylbenzenesulfonate: Detergents, egg albumin, electrophoresis, *Lundgren, Elam, and O'Connell*, 183
Amino nitrogen: Anomalous, *Carter and Dickman*, 571
Blood, determination, colorimetric, *Frame, Russell, and Wilhelmi*, 255
Anemia: Anti-, vitamin, chick, *O'Dell and Hogan*, 323
Bone marrow lipids, effect, *Krause* 395
Anserine: Transmethylation relation, *Schenck, Simmonds, Cohn, Stevens, and du Vigneaud*, 355
Asparagine: -Glutamic acid mixtures, nicotinamide-like substance, determination, *Bovarnick*, 301
Aspergillus sydowi: Mycelium, cerebrin isolation, *Bohonos and Peterson*, 295

B

Bacillus: *See also Lactobacillus casei*
Bean: Soy. *See* Soy bean
Benzenesulfonate: Alkyl-, detergents, egg albumin, electrophoresis, *Lundgren, Elam, and O'Connell*, 183
Betaine: Growth effect, chick, *Almquist and Grau*, 575
Blood: Amino nitrogen determination, colorimetric, *Frame, Russell, and Wilhelmi*, 255
Blood serum: Phosphorus, glucose, galactose, and xylose effect, *Free and Leonards*, 203
Turbid, extinction-wave-length relation, *Gaebler*, 251
Blood sugar: Determination, *o*-phenanthroline ferrous complex as indicator, *MacFadyen and Van Slyke*, 527
Bone marrow: Lipids, anemia effect, *Krause*, 395
Buffer salt(s): Thiamine, effect, *Beadle, Greenwood, and Kraybill*, 339

C

Carbonyl compound: Liver, identity, *Lehninger*, 43
Carotene: Destruction, chlorophyll effect, *Pepkowitz*, 465
Stability, sodium cyanide effect, *Pepkowitz*, 465
—, vegetable extracts, acetone and petroleum ether, *Pepkowitz*, 465
Casein: Iodinated, thyroxine, crystalline, recovery, *Reineke and Turner*, 555
—, *l*-thyroxine recovery, *Reineke and Turner*, 563
Liver phosphorus, acid-soluble, distribution, fasting, effect, *Rapoport, Leva, and Guest*, 65
Catalase: Tissue, pyridoxine effect, *Lepkovsky and Parsons*, 281
Cerebrin: *Aspergillus sydowi* mycelium, isolation, *Bohonos and Peterson*, 295
Cerebrum: Phosphorus compounds, acid-soluble, *Stone*, 29

Chick: Antianemia vitamin, *O'Dell and Hogan*, 323
Chlorophyll: Carotene destruction, effect, *Pepkowitz*, 465
Cholesterol: Cholic acid relation to biological conversion of, *Bloch, Berg, and Rittenberg*, 511
Deuterio-, preparation, *Bloch and Rittenberg*, 505
Cholic acid: Cholesterol conversion, biological, relation, *Bloch, Berg, and Rittenberg*, 511
Choline: Deficiency, liver fat, effect, *Handler*, 291
Methyl groups, methionine synthesis, biological, use, *Simmonds, Cohn, Chandler, and du Vigneaud*, 519
Coagulation: Fibrinogen, *Chargaff and Bendich*, 93
Coccidioides immitis: Polysaccharide, immunologically active, *Hassid, Baker, and McCready*, 303
Cysteine: Derivatives, urine cystine, cystinuria, effect, *Hess and Sullivan*, 543
Urine cystine, cystinuria, effect, *Hess and Sullivan*, 543
Cystine: Derivatives, urine cystine, cystinuria, effect, *Hess and Sullivan*, 543
Urine cystine, cystinuria, effect, *Hess and Sullivan*, 543
Cystinuria: Cystine and cysteine and derivatives, urine cystine, effect, *Hess and Sullivan*, 543
Dog, *Hess and Sullivan*, 543
Homocystine and homocysteine, urine cystine, effect, *Hess and Sullivan*, 543
Cytochrome: *c*, determination, spectrophotometric, micro, *Rosenthal and Drabkin*, 437
Oxidase, tissue, determination, *Schneider and Potter*, 217

D

Dehydrogenase: α-Ketoglutaric, heart, *Ochoa*, 577
Succinic, tissue, determination, *Schneider and Potter*, 217
Detergent(s): Alkylbenzenesulfonate, egg albumin, electrophoresis, *Lundgren, Elam, and O'Connell*, 183
Deuteriocholesterol: Preparation, *Bloch and Rittenberg*, 505
Diamine(s): Deamination, oxidative, histaminase action, *Stephenson*, 169
Diet: Body fat, keeping quality, effect, *Barnes, Lundberg, Hanson, and Burr*, 313
Mixed, liver phosphorus, acid-soluble, distribution, fasting, effect, *Rapoport, Leva, and Guest*, 65
Dinitrophenol: Spermatozoon metabolism, effect, *Lardy and Phillips*, 177
Dog: Cystinuria, *Hess and Sullivan*, 543

E

Egg albumin: Alkylbenzenesulfonate detergents, electrophoresis, *Lundgren, Elam, and O'Connell*, 183
Enzyme(s): Proteolytic, histamine and, *Rocha e Silva and Andrade*, 9
Respiratory, tissue, determination, *Schneider and Potter*, 217
See also Aldolase, Catalase, Dehydrogenase, Histaminase, Hurain, Lipoxidase, Oxidase, Papain, Phosphatase, Trypsin

F

Fasting: Liver glycogen, glucose feeding, effect, *Treadwell, Tidwell, and Grafa*, 209
— lipids, glucose feeding, effect, *Treadwell, Tidwell, and Grafa*, 209
— phosphorus, acid-soluble, distribution, diet effect, *Rapoport, Leva, and Guest*, 65
— —, —, —, effect, *Rapoport, Leva, and Guest*, 57
Fat: Body, keeping quality, diet effect, *Barnes, Lundberg, Hanson, and Burr*, 313
Liver, mineral and choline deficiency, effect, *Handler*, 291
Feces: Tocopherol, *Hines and Mattill*, 549
Ferritin: *Granick*, 157
Immunological properties, *Granick*, 157
Occurrence, *Granick*, 157

Fibrinogen: Coagulation, *Chargaff and Bendich*, 93

G

Galactose: Blood serum phosphorus, effect, *Free and Leonards*, 203
Glucose: Blood serum phosphorus, effect, *Free and Leonards*, 203
Liver glycogen, fasting, effect, *Treadwell, Tidwell, and Grafa*, 209
— lipids, fasting, effect, *Treadwell, Tidwell, and Grafa*, 209
— phosphorus, acid-soluble, distribution, fasting, effect, *Rapoport, Leva, and Guest*, 65
Glutamic acid: -Asparagine mixtures, nicotinamide-like substance, determination, *Bovarnick*, 301
Glutaric dehydrogenase: α-Keto-, heart, *Ochoa*, 577
Glyceraldehyde phosphate: Phosphorylation, *Meyerhof and Junowicz-Kocholaty*, 71
Glycerol: Phospho-, acid-soluble, liver, determination, *Leva and Rapoport*, 47
Glycogen: Liver, fasting and glucose feeding, effect, *Treadwell, Tidwell, and Grafa*, 209
Growth: Betaine effect, chick, *Almquist and Grau*, 575
Factor, *Lactobacillus casei*, properties, *Stokstad*, 573

H

Heart: α-Ketoglutaric dehydrogenase, *Ochoa*, 577
Hexitol(s): Metabolism, *Johnston and Deuel*, 117
Histaminase: Diamine deamination, oxidative, effect, *Stephenson*, 169
Histamine: Enzymes, proteolytic, and, *Rocha e Silva and Andrade*, 9
Liberation, papain effect, *Rocha e Silva and Andrade*, 9
Homocysteine: Urine cystine, cystinuria, effect, *Hess and Sullivan*, 543
Homocystine: Urine cystine, cystinuria, effect, *Hess and Sullivan*, 543
Hura crepitans: Protease, *Jaffé*, 1
Hurain: *Jaffé*, 1

I

Intestine: Phosphatase, *Schmidt and Thannhauser*, 369
Isomerase: Equilibrium, *Meyerhof and Junowicz-Kocholaty*, 71

K

Ketoglutaric dehydrogenase: α-, heart, *Ochoa*, 577
Ketosis: *Johnston and Deuel*, 117

L

Lactobacillus casei: Growth factor, properties, *Stokstad*, 573
Lipid(s): Bone marrow, anemia effect, *Krause*, 395
Liver, fasting and glucose feeding, effect, *Treadwell, Tidwell, and Grafa*, 209
Lipoxidase: Soy bean, *Balls, Axelrod, and Kies*, 491
Liver: Carbonyl compound, identity, *Lehninger*, 43
Fat, mineral and choline deficiency, effect, *Handler*, 291
Glycogen, fasting and glucose feeding, effect, *Treadwell, Tidwell, and Grafa*, 209
Lipids, fasting and glucose feeding, effect, *Treadwell, Tidwell, and Grafa*, 209
Phosphoglycerol, acid-soluble, determination, *Leva and Rapoport*, 47
Phosphorus, acid-soluble, distribution, fasting, diet effect, *Rapoport, Leva, and Guest*, 65
—, —, —, — effect, *Rapoport, Leva, and Guest*, 57
Tocopherol determination, *Hines and Mattill*, 549

M

Meat: Thiamine, curing effect, *Greenwood, Beadle, and Kraybill*, 349
Methionine: Synthesis, biological, choline methyl groups, use, *Simmonds, Cohn, Chandler, and du Vigneaud*, 519

Mineral: Deficiency, liver fat, effect, *Handler*, 291
Mold: Tissue, chemistry, *Bohonos and Peterson*, 295
See also Aspergillus sydowi
Muscle: Tocopherol determination, *Hines and Mattill*, 549
See also Heart

N

Nicotinamide: -Like substance, asparagine-glutamic acid mixtures, determination, *Bovarnick*, 301
Nicotinic acid: Determination, *Martinek, Kirch, and Webster*, 245
Nitrogen: Amino. *See* Amino nitrogen

O

Oat(s): Germinating, protein synthesis, *Albaum and Cohen*, 19
—, transamination, *Albaum and Cohen*, 19
Olive oil: Liver phosphorus, acid-soluble, distribution, fasting, effect, *Rapoport, Leva, and Guest*, 65
Oxidase: Cytochrome, tissue, determination, *Schneider and Potter*, 217

P

Papain: Histamine liberation by, *Rocha e Silva and Andrade*, 9
Perspiration: Vitamins, *Mickelsen and Keys*, 479
Phenanthroline: *o*-, ferrous complex, blood sugar determination, indicator, *MacFadyen and Van Slyke*, 527
Phosphatase: Intestine, *Schmidt and Thannhauser*, 369
Phosphoglycerol: Acid-soluble, liver, determination, *Leva and Rapoport*, 47
Phosphorus: Acid-soluble, liver, distribution, fasting, diet effect, *Rapoport, Leva, and Guest*, 65
—, —, —, — effect, *Rapoport, Leva, and Guest*, 57
Blood serum, glucose, galactose, and xylose effect, *Free and Leonards*, 203
Phosphorus compound(s): Acid-soluble, cerebrum, *Stone*, 29
Pituitary: Adrenotropic hormone, preparation and properties, *Sayers, White, and Long*, 425
Plant: Protease, *Hura crepitans, Jaffé*, 1
Polysaccharide(s): *Coccidioides immitis*, immunologically active, *Hassid, Baker, and McCready*, 303
Potassium: Adenylic system, phosphorylation, rôle, *Boyer, Lardy, and Phillips*, 529
Protease: *Hura crepitans, Jaffé*, 1
Protein(s): Oats, germinating, synthesis, *Albaum and Cohen*, 19
Proteolysis: Enzymes, histamine and, *Rocha e Silva and Andrade*, 9
Protoveratrine: *Jacobs and Craig*, 271
Alkamine, *Jacobs and Craig*, 271
Protoverine: *Jacobs and Craig*, 271
Pyridine: Analogue, thiamine deficiency disease production, *Woolley and White*, 285
Pyridoxine: Bound, biological materials, *Siegel, Melnick, and Oser*, 361
Deficiency, tryptophane metabolism, xanthurenic acid effect, *Lepkovsky, Roboz, and Haagen-Smit*, 195
Tissue catalase, effect, *Lepkovsky and Parsons*, 281
Pyruvate: Alcohol and, oxidation-reduction, coupled, *in vivo, Westerfeld, Stotz, and Berg*, 237

R

Respiratory enzyme(s): Tissue, determination, *Schneider and Potter*, 217

S

Sodium cyanide: Carotene stability, effect, *Pepkowitz*, 465
Solanidine: Veratrine bases and, relationship, *Craig and Jacobs*, 451
Soy bean: Lipoxidase, *Balls, Axelrod, and Kies*, 491
Spectrophotometry: *Rosenthal and Drabkin*, 437
Spermatozoa: Metabolism, dinitrophenol effect, *Lardy and Phillips*, 177
—, thyroxine effect, *Lardy and Phillips*, 177

Succinic dehydrogenase: Tissue, determination, *Schneider and Potter*, 217

T

Thiamine: Buffer salts, effect, *Beadle, Greenwood, and Kraybill*, 339
Deficiency disease, pyridine analogue, effect, *Woolley and White*, 285
Heat effect, *Beadle, Greenwood, and Kraybill*, 339
Greenwood, Beadle, and Kraybill, 349
Hydrogen ion concentration, effect, *Beadle, Greenwood, and Kraybill*, 339
Meat, curing effect, *Greenwood, Beadle, and Kraybill*, 349
Thyroxine: Crystalline, casein, iodinated, recovery, *Reineke and Turner*, 555
l-, casein, iodinated, recovery, *Reineke and Turner*, 563
Spermatozoon metabolism, effect, *Lardy and Phillips*, 177
Tocopherol(s): Feces, *Hines and Mattill*, 549
Liver, determination, *Hines and Mattill*, 549
Muscle, determination, *Hines and Mattill*, 549
Urine, *Hines and Mattill*, 549
Transamination: Oats, germinating, *Albaum and Cohen*, 19
Transmethylation: Anserine, relation, *Schenck, Simmonds, Cohn, Stevens, and du Vigneaud*, 355
Trypsin: Ultraviolet radiation effect, *Verbrugge*, 405
Tryptophane: Metabolism, pyridoxine deficiency, xanthurenic acid effect, *Lepkovsky, Roboz, and Haagen-Smit*, 195
Tyrothricin: Determination, *Dimick*, 387

U

Urine: Cystine excretion, cystinuria, cystine and cysteine derivatives, effect, *Hess and Sullivan*, 543
— —, —, homocystine and homocysteine effect, *Hess and Sullivan*, 543
Tocopherol, *Hines and Mattill*, 549

V

Vegetable(s): Green, extracts, acetone and petroleum ether, carotene stability, *Pepkowitz*, 465
Veratrine: Alkaloids, *Jacobs and Craig*, 271
Craig and Jacobs, 451
Bases and solanidine, relationship, *Craig and Jacobs*, 451
Proto-, *Jacobs and Craig*, 271
—, alkamine, *Jacobs and Craig*, 271
Vitamin(s): A_2, activity, *Jensen, Shantz, Embree, Cawley, and Harris*, 473
Antianemia, chick, *O'Dell and Hogan*, 323
B_6. *See also* Pyridoxine
D_2, crystalline, stability, *Huber and Barlow*, 125
— derivatives, crystalline, stability, *Huber and Barlow*, 125
D_3, crystalline, stability, *Huber and Barlow*, 125
— derivatives, crystalline, stability, *Huber and Barlow*, 125
Perspiration, *Mickelsen and Keys*, 479

W

Water: Tissue, *Miller*, 153
—, determination, distillation method, *Miller*, 153

X

Xanthurenic acid: Tryptophane metabolism, pyridoxine deficiency, effect, *Lepkovsky, Roboz, and Haagen-Smit*, 195
Xylose: Blood serum phosphorus, effect, *Free and Leonards*, 203

Z

Zinc: Metabolism, radioactive isotope in study, *Sheline, Chaikoff, Jones, and Montgomery*, 139
Radioactive, tissues, radioactive zinc isotope in study, *Sheline, Chaikoff, Jones, and Montgomery*, 139
